Philosophy

- A web presence requires continuous uptime.
- Uptime requires:
 - Servers working properly – patched, backed up, defragmented, optimized
 - Sufficient Bandwidth to handle various loading conditions
 - Application and Database functioning correctly
- The only way to provide uptime is to be able to touch all of these factors.

Facilities

- Offices in Midtown Atlanta

- Data Center in Suwanee, GA

Data Center

- Located 20 minutes north of Atlanta
- Data Center is 4 football fields in size
- Multiple redundant Internet connections
- Flywheel Power Generators
- Level 4 security
- Other significant customer (besides us) is Google

Bigger is better....

*People, Processes
& Facilities*
